# Jeniffer Pablo

Grand Rapids, MI | pabloj@mail.gvsu.edu | (616) 228-3234 | linkedin.com/in/jencpablo | github.com/jeni-pab

## PROFESSIONAL SUMMARY

Computer Science student at Grand Valley State University with hands-on software engineering internship experience building Python applications, integrating ML models into production systems, and automating validation workflows. Skilled in Python, PyTorch, SQL, and Git; experienced shipping reliable, maintainable software in a collaborative engineering environment.

## EDUCATION

**Grand Valley State University** Allendale, MI

Bachelor of Science, Computer Science. Minor in Mathematics. GPA: 3.478/4.00. Expected Apr. 2027

Relevant Coursework: Programming Fundamentals, OOP, Data Structures, Discrete Mathematics, Applied Statistics, Systems-Level Programming, Databases, Intro to AI, Software Engineering

**Grand Rapids Community College** Grand Rapids, MI

Associate of Arts, Pre-Computer Science. GPA: 3.3/4.00. Apr. 2024

## EXPERIENCE

**CAE Software Engineering Intern** May 2026 – Present

*Shape Corp. — Grand Haven, MI*

- Developed and maintained a Python-based web application used by product development engineers to run ML-powered predictions across multiple CAE simulation workflows
- Integrated machine learning models into production software, validating prediction accuracy and application performance
- Refactored legacy Python code into reusable shared modules, reducing duplication and improving maintainability
- Designed and implemented automated validation processes to verify engineering models, software functionality, and user inputs
- Debugged software defects, investigated root causes, and resolved issues in application behavior and user interfaces
- Collaborated with engineers via Git and GitHub to test, review, and ship software enhancements iteratively

**Server/Bartender** Aug. 2023 – Present

*Condado Tacos — Grand Rapids, MI*

- Provided customer service in a high-volume restaurant, serving over 100 guests per shift
- Trained new staff on service protocols, strengthening team consistency and efficiency

**Server** Jun. 2021 – Mar. 2025

*Garibaldi — Grand Rapids, MI*

- Handled payments with 100% accuracy while maintaining a welcoming and clean dining environment

## PROJECTS

**CAE Engineering Prediction Platform**

- Built an internal Streamlit tool at Shape Corp. enabling product development engineers to run ML-based automotive design predictions in 2-3 minutes, replacing a manual handoff process; integrated PyTorch models with validation and reusable UI components

**Social Media Management System**

- Designed an ER diagram and relational schema for a multi-user social media platform; implemented in SQL with queries using joins, subqueries, and aggregate functions to analyze posts, engagement, and team membership

**Makeup Tool Recommendation**

- Built a recommendation tool using a public Makeup API to surface product suggestions by category; retrieved and processed JSON data to display results in a user-friendly format

**Balatro Lite**

- Developed a simplified card game in Python with poker-based scoring and unit testing

## ACTIVITIES & LEADERSHIP

**Futuro Leaders Fellowship, West Michigan Hispanic Chamber of Commerce**

- Selected for a leadership program for Hispanic/Latino college students, with 1:1 professional mentoring
- Attend monthly cohort sessions and networking events with employer partners and fellowship alumni

**Multicultural Greek Council**

- Collaborated with multicultural Greek organizations to plan and promote cultural and community events
- Promoted unity, cultural awareness, and service across member organizations

**Sigma Lambda Gamma Sorority, Inc.**

*Vice President of Social Media*

- Promoted chapter events and values through digital platforms while upholding the pillars of academics, community service, cultural awareness, social interaction, and morals and ethics

## SKILLS

**Languages & Tools:** Python, C, C++, SQL, Git, GitHub, PyTorch, Pandas, Scikit-learn, Streamlit, JavaScript, HTML, Linux, Tkinter, VS Code, PyCharm

**Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms, Machine Learning Model Integration, Software Development, API Integration, Unit Testing, Input Validation, Data Visualization, GUI Development
